

EvoFol

Quatrefolic⁺
Vitamin B12 & Iodine

SUPPLEMENT FACTS

Each Tablet Contains

Quatrefolic (USP)	600 mcg
Vitamin B12 (USP)	500 mcg
Iodine (BP)	150 mcg

EvoFol is a dietary supplement based on Quatrefolic, Vitamin B12 and Iodine for a healthy development of fetus during early pregnancy.

Quatrefolic also known as (vitamin B9) reduces levels of homocysteine in the blood therefore reduces the chance of development of neural tube defects in the developing fetus. Quatrefolic is the most assimilable and active form of folic acid, ensuring a greater action of the vitamin in the body.

Vitamin B12 acts as an essential coenzyme in cell replication. During pregnancy, it facilitates the uptake of folic acid. Their deficit is associated with an increased risk of spina bifida.

Iodine is essential for the production of maternal and fetal thyroid hormones that regulate the development of the fetal brain and nervous system.

DOSAGE:

1-2 tablets daily with meal or as directed by the physician.

Swallow with a glass of water. Do not exceed the recommended intake.

STORAGE INSTRUCTIONS:

Store in a cool and dry place. Protect from light & moisture. Keep out of reach of children.

PRESENTATION:

Available in 30 tablets in Alu-PVC-Alu pouch blister pack.

Manufactured by:
